

Mitigating the Occurrences of Violence

Within Healthcare Organizations

Training that empowers the healthcare professional to cognitively recognize and properly respond to behaviors consistent with client dissatisfaction or dangerous situations. Proven techniques focus on safety not only for the patient or client, but also for the professional.

A Proven Verbal De-Escalation Platform

Simple, tangible takeaways, accentuating existing levels of emotional intelligence, proven principles, protocols and communication variables.

Behavior Management Strategies

Four cornerstones solidify the Behavior Management Strategies and forge a dynamic multidisciplinary approach to resolving conflict.

Armed Violent Intruder Response

Principally-based doctrine created a formula of core elements that empower the healthcare professional through a series of proactive action steps, decision-making skills and personal safety tools.

Our Mission

At Mitigation Dynamics Institute, we thrive at creating a trusted partnership with our customers. It's all about open communication, principally-based problem solving and sustainable solutions.

About Us

Integrity above all else, our TEAM is anchored in a shared faith and servant mentality. Focused on healthcare exclusively, we specialize in regulatory compliance and workplace violence mitigation. Partnering with healthcare organizations to empower the lives of those who save lives, is our "WHY."

Four-Pillar Approach

We ensure all elements of our Workplace Violence Mitigation System are in balance with our Four-Pillar Principles.

Should a sentinel event occur and investigations follow, healthcare organizations will be scrutinized on the following:

01 | POLICY

Was policy related to the particular event in place?

02 | PROCEDURE

Were procedures outlined within the policy or otherwise?

03 | TRAINING

Was training conducted in support of the policy and procedure?

04 | DRILLS

Were drills conducted to validate the training?

Our content experts work diligently to insulate you from unnecessary liability and the complexities of existing regulations.

MDI content experts with decades of experience partner with healthcare organizations to identify gaps and solutions to meet the robust nature of regulatory compliance that is now expected by Centers for Medicare and Medicaid Services (CMS) and accrediting bodies, such as The Joint Commission (TJC).

Whether physical environment, emergency management, physical security, access control or specialized areas, such as ligature risk assessment and diagnostic imaging, MDI content experts insulate healthcare organizations from the complexity of CMS regulations. TEAM MDI is your solution.

Economic Benefits

The economic costs associated with achieving compliance and a safe workplace by partnering with MDI is offset by higher patient satisfaction and higher reimbursements from CMS.

Further, lower turnover of personnel creates a culture of cross functional support for all phases of healthcare that translate to predictable financial results.

Our Staff

Each member of MDI staffing has decades of experience in either regulatory compliance and/or workplace violence mitigation.

Comprised of first responders, healthcare professionals and military personnel, these practitioners are detail oriented and driven to succeed.

Because of this, they have the unique ability to transfer that knowledge to the healthcare professional in an effective and meaningful manner.
